In this third stage of the challenge, we progress the mobility work from the first stage, and add some light plyometric exercises to work on your efficiency of loading at the ankle. Frequently Asked Questions

How does this programme with my current training plan?

We had this specific question in mind when developing the challenge material. The nature of the 10-15min daily workouts we've put together mean that they won't add significant training volume or intensity to your regular plan. So whether you're training for your first 5km race or pushing for a sub 9hr Ironman finish, you'll be able to follow the workouts effectively.

What equipment will I need to take part in the 30 Day Challenge?

Very little. Most of the exercises we've chosen require no equipment. Some may require a little improvisation, such as finding a step. The only specific equipment we use is a resistance band, which many runners will have access to, and can be purchased cheaply here: [Amazon – Resistance Bands](#).

I'm currently injured, can I still take part?

All injuries are different, and your rehab is unique to your circumstances. Take the guidance of your Physical a Therapist and listen to your body. Don't be tempted to exercise through pain. If it hurts, stop!

Where can I get more support, and answers to specific questions?

Please do come and join us in the [Transform Your Running - 30 Day Challenge Facebook Group](#). This is the perfect place for you to have your questions answered, discover alternative exercises and get more from the challenge!
